Product of Wagler Mfg.

Wagler Manufacturing Presents Curtis Custom Calls

Welcome

To start, I would like you to understand our product line.

Our hunting call line was designed to be hunter oriented (not contest oriented) which means that we produce hunting products that are geared towards trouble free in the field performance!

Our hardwood line of calls feature custom ground tone boards, sealed with waterproof finish to be stick free. The barrel & tone blanks are custom turned in the USA.

Turkey calls are CNC Machined to tight tolerances for great sound, with 1 piece components.

We have even offered an economy line to get the hunters with alot of mouthes to feed into our calls. This ensures the dinner bell will ring.

My Story!

I have been in duck blinds where guys will think they are the worlds best caller, they're not!. In my experience, alot of todays waterfowl calls are geared towards the stage, (not to say a world title wouldn't be nice!) but I have found that waterfowl generally won't respond to that calling pressure & volume. We tune our calls to be effective on the animals we hunt. Not everyone will like our call sound because it might not be the same identical noise they are used to hearing. You will notice our calls have a different look &/or design. This is because each model we produce is CAD Drawn or hand carved to make the master from which production models derive. As you glance the racks in your store, you will probably notice we are one of the few that look different. Different is exactly what sets you apart in the field. This is fine because the ducks, deer & predators love them! Remember that all of our calls are tuneable for a higher or lower pitch by lengthening or shortening the reed length from the retainer. We try to be educational for the outdoorsman who wants to be the best they can. If you are looking for professional tools that are proudly made in the USA, you're in the right book!

When someone hands me a call & says it doesn't sound good, I hand them a picture & say (These are the ears I was after, must have sounded real Goood) don't ya think!

Visit www.curtiscustomcalls.com to hear the call sounds!
Each model we sell has been field tested with much sucess!

Curtis Custom Calls Turkey Calls

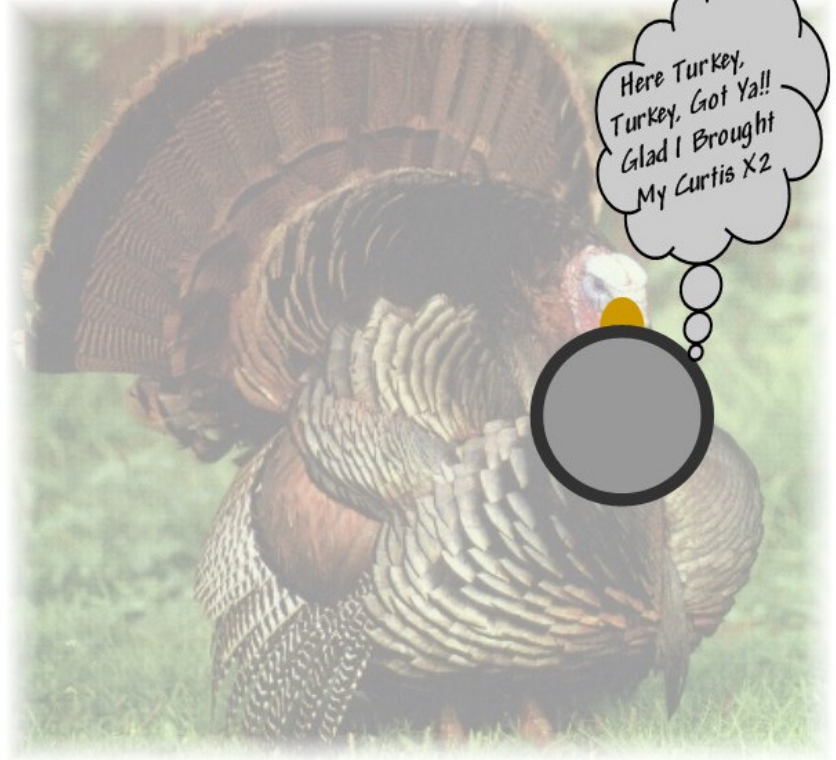

FINE HUNTING CALLS

Traditions of Collecting Fans, Beards & Spurs

Wagler Woodcrafts, Manufacturing

605 N. Parkway

Wayland, IA 52654

(319)256-9663

Owner: Curt Wagler

This business is a trade that has been passed down generation to generation. Curt's grandfather started woodworking as a hobby, his dad, Delmer expanded on that by building home interior items for retail. Curt then expanded the business into manufacturing as well as retail. We now offer premiere quality wood, plastic, & metal products.

The business started out in a small shop behind Curt's father, Delmer's house & last July was the Grand Opening for Curt's new building in the Wayland Industrial Park.

In the last year since opening the new facility Curt has met the challenges of a growing business with:

- Bigger machinery to produce a higher volume of parts & products
- Added more room in the facility for a large computer itemized packing room
- Added more room in the facility for a top of the line custom assembly room
- Added a new design your own kitchen cabinet center with a one of a kind hands on build your own cabinet door for the convenience of our customers
- More clientele from not only individuals but from factories & big businesses as well
- An increase in wholesale sales in the U.S. & overseas. The increase is largely due to local factories & retailers learning about our competitive rates, diverse offerings, & small & large quantities.
- Due to our in house website, web sales are on the rise daily
- One of Curt's biggest challenges is building a lot of his own specialized automated & conventional types of machinery to keep the facility running efficiently for a business that continues to grow on a daily basis

Shipping and Delivery Terms

All items are priced FOB Factory.
Shipping and/or delivery are charged per individual order.

If the item is small enough to ship UPS, Fed Ex, or USPS, the shipment charges are by amount of sale for up to 5 item purchases.

These prices are not eligible on items totaling over 50 pounds!

We ship by UPS, FED EX, or USPS for small shipments, at our disgression. We also, will charge recievers account if requested (which eliminates shipping charges from us on invoices). You would pay the carrier directly. If this is your preference, please put your shipper # in the shipping price box & mention the carrier.

Sorry, No COD's.

| <i>Purchase Price</i> | <i>Shipping Charge For Shipments in the US only</i> |
|------------------------------|------------------------------------------------------------|
| \$0.01 - \$9.99 | \$5.00 |
| \$10.00 - \$49.99 | \$9.00 |
| \$50.00 - \$99.99 | \$15.00 |
| \$100.00 - \$199.99 | \$20.00 |
| \$200.00 and over | \$25.00 |

For large shipments, we use insured freight haulers. Most shipments go by PANAMA TRANSFER. We get great rates on large shipments out of our dock but we can't guarantee rates on large shipments as they are dependant on weight. The charges are added to the invoice or charged COD. Your choice!

If you request a quote for your production needs, we can possibly set a solid freight rate for your company's products!

Delivery

There is \$48 minimum fee for delivery or \$1.10 per mile.

We will deliver or ship by large truck, whichever is more economical for the customer.

To keep our shipping and delivery costs down, some minor assembly may be required on bulky items, such as tables.

Please continue to visit our dealers for your product needs, their shelves are full of quality products!

Dealer Info.

*Visit www.waglerwood.com for any product questions!
We are continually striving to engineer the products you deserve that last a lifetime, with a retail dealer network that is accommodating to your needs & desires!*
